1) First open the prolog(version : AMD64,8.4.2) and compile my file (a3.pl).

2) Then write the question axioms related to knowledge base[IN task 1 and task 2 file]. You will find the solution of related question.

   And if you want to know how to execute the any questions then check file "Task3" in zip file.
    I have put the picture description in the file. You will know how to execute the file of the prolog.
